

Spend a summer in the San Juan Islands!

Marine Animal Bioacoustics

FHL 585 - 9 credits

Course will provide students with a broad understanding of the acoustic tools and techniques required for investigating fundamental questions of animal bioacoustics, behavior and communication with special emphasis on local marine mammals and fishes found near the San Juan islands, WA. Format will involve a combination of lectures, hands-on training, lab exercises, and student-led projects.

INSTRUCTORS:

Dr. Joseph Sisneros, *University of Washington Department of Psychology*

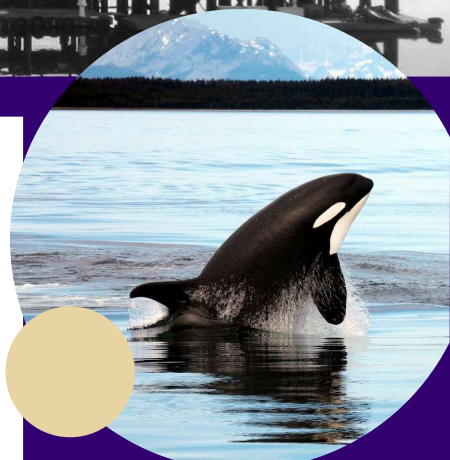

Dr. Timothy Tricas, *University of Hawaii, Department of Biology*

Dr. Lane Seeley, *Seattle Pacific University, Department of Physics*

June 15 – July 17, 2020 (5 weeks)

- Friday Harbor Laboratory -

San Juan Island, WA, USA
